

# Progression in Chemistry

	Studying Rocks and soils	Properties of materials	Relating properties of materials to their uses	Changing states of materials
Y6				
Y5		Classify according to properties; reversible and irreversible changes	Justify uses of materials from test results	
Y4				Changes of state in the water cycle
Y3	Soil and fossil formation			
Y2		Changing the shape of materials	Relating properties to uses	
Y1		Identify materials and distinguish from objects  Naming everyday materials, identifying properties and grouping them
