

**Silver Springs Primary Academy
Sports Premium Plan 2024 - 2025**

Barriers to Participation in Sport

1. Cost of local clubs

Due to high deprivation indices, parents of children in the locality are less likely to take their children to take part in regular sporting activities at local sports clubs or swimming lessons due to the additional costs of fees, kit and equipment.

2. Lack of transport and cost of transport

Ward Level data shows that only 45% of households in the two main wards serving the school have access to a family vehicle, which means that for the majority of children parents are reliant on public transport or walking to nearby sports clubs / swimming pools.

3. Parents lack of confidence / time

Many parents themselves lack confidence in finding and accessing these kinds of services or are unable to commit to the regular attendance required for attendance to become habitual and therefore lead to long-term benefits for their children. Additionally, for significant numbers of children this is not an activity that is valued by the family and children are more likely to spend large amounts of out of school hours playing out with friends in the neighbourhood

4. Lack of knowledge of local activities available

Many parents are unaware of the wide range of activities and clubs available locally and require signposting to these via school as there is no real central hub with this information readily available.

5. SEND

Growing numbers of children in school with Physical needs and disabilities including ASD and ADHD. Levels of dysregulation are high. Parents struggle to access facilities locally because of the levels of need.

Locality Health Indicators

- Local data shows that adults in the locality are more likely to die of a heart attack or stroke between the ages of 40 – 60 than anywhere else in Greater Manchester. Life expectancy locally is 10.4 years lower for men and 8 years lower for women in the most deprived areas of Tameside compared to the least deprived areas. In Tameside, in Year 6, 33.9% of children are classified in the excess weight category.

Rationale for Pupil Premium Spend

Our Sports Premium spending aims to address the impact of the identified barriers to participation as well as continue to extend the range of opportunities on offer and improve the quality of teaching and learning in this area of the curriculum. We want all our children to benefit from an active school lifestyle and take a lifelong positive interest in sport and fitness participation. We want children to understand the benefits of active lifestyles on their health and be able to experience a broad range of activities. We believe that the best way to ensure high quality delivery is to invest in specialist coaching and teaching and link with professional networks.
